

# INTERNATIONAL SCHOOL ON ARTIFICIAL INTELLIGENCE FOR COGNITIVE TECHNOLOGIES: ISACT 2026

## Day 1: 1<sup>st</sup> July (Wednesday)

| Singapore     | UTC | Speaker                                                                                      | Topic                                                                              | Location            |
|---------------|-----|----------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|---------------------|
| 8:45 – 9:00   | --  |                                                                                              | Opening Ceremony                                                                   | ARC Lecture Theatre |
| 9:00 – 10:00  |     | Prof. Ljiljana Trajković<br>Simon Fraser University,<br>Burnaby, British Columbia,<br>Canada | Keynote #1: Data Mining and<br>Machine Learning for Analysis of<br>Network Traffic | ARC Lecture Theatre |
| 10:00 – 10:15 | --  |                                                                                              | Tea Break                                                                          |                     |
| 10:15 – 11:00 |     | Participants                                                                                 | Session #0: Introductions &<br>research presentations                              | TR26                |
| 11:00 – 12:15 |     | Dr Erasmo Purificato<br>European Commission - Joint<br>Research Centre, Italy                | Session #1: Role of AI in<br>Scientific Research                                   | TR26                |
| 12:15 – 12:45 |     | Prof Atul Negi<br>University of Hyderabad, India                                             | Session #2: Origins of AI Systems<br>Leading to Explainable AI and<br>Applications | TR26                |
| 12:45 – 13:15 |     | Prof Sanjay Ghosh<br>Indian Institute of Technology<br>Kharagpur, India                      | Session #3: EEG-based Graph<br>Attention Network for Depression<br>Detection       | TR26                |
| 13:15 – 14:00 | --  |                                                                                              | Lunch Break                                                                        |                     |
| 14:00 – 15:30 |     | Dr Paolo Sorino<br>Politecnico di Bari, Italy                                                | Session #4: AI for BCI with<br>applications                                        | TR26                |
| 15:30 – 17:00 |     | Dr Arinbjörn Kolbeinsson<br>K01 + Regava + University of<br>Iceland, Iceland                 | Session #5: Controllable AI for<br>Healthcare and Law                              | TR26                |
| 17:00 – 17:15 | --  |                                                                                              | Tea Break                                                                          |                     |

## Day 2: 2<sup>nd</sup> July (Thursday)

| Singapore     | UTC | Speaker                                            | Topic                                                                       | Location            |
|---------------|-----|----------------------------------------------------|-----------------------------------------------------------------------------|---------------------|
| 9:00 – 10:00  |     | Prof. Toshio Fukuda<br>Nagoya University, Japan    | Keynote #2: AI Robots and Future Direction: Embodied Intelligence and Robot | ARC Lecture Theatre |
| 10:00 – 10:15 | --  |                                                    | Tea Break                                                                   |                     |
| 10:15 – 13:15 |     | CHAIS Summer School                                | Session #6: Collaborative Human-AI Symbiosis                                | TR27                |
| 13:15 – 14:00 | --  |                                                    | Lunch Break                                                                 |                     |
| 14:00 – 16:15 |     | CHAIS Summer School                                | Session #7: Collaborative Human-AI Symbiosis                                | TR27                |
| 16:15 – 16:30 | --  |                                                    | Tea Break                                                                   |                     |
| 16:30 – 17:30 |     | Prof. Henry Leung<br>Università di Calgary, Canada | Session #8: IEEE Distinguished Lecture                                      | ARC Lecture Theatre |
| 17:30 – 18:30 | --  |                                                    | Bus to YWCA at Fort Canning                                                 |                     |
| 18:30 – 21:30 | --  |                                                    | Gala Dinner                                                                 | YWCA Fort Canning   |

## Day 1: 3<sup>rd</sup> July (Friday)

| Singapore     | UTC | Speaker                                                              | Topic                                                                        | Location            |
|---------------|-----|----------------------------------------------------------------------|------------------------------------------------------------------------------|---------------------|
| 9:00 – 10:00  |     | Prof. Chen Chun-Hsien<br>Nanyang Technological University, Singapore | Keynote #3: AI-aided Human Factors in Intelligent Traffic Management Systems | ARC Lecture Theatre |
| 10:00 – 10:15 | --  |                                                                      | Tea Break                                                                    |                     |
| 10:15 – 10:45 |     | Participants                                                         | Session #9: Introductions & research presentations                           | TR26                |

|                  |                                                                                                                                                                       |                                                        |      |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------|------|
| 10:45 –<br>12:00 | Dr Soumick Chatterjee<br>Human Technopole, Milan,<br>Italy and Otto von Guericke<br>University Magdeburg,<br>Germany                                                  | Session #10: Trustworthy Medical<br>AI                 |      |
| 12:00 –<br>13:15 | Prof Anirban<br>Mukhopadhyay<br>TU Darmstadt, Germany                                                                                                                 | Session #11: Structured Surgical<br>World Models       | TR26 |
| 13:15 –<br>14:00 | --                                                                                                                                                                    | Lunch Break                                            |      |
| 14:00 –<br>15:00 | Prof Cataldo Musto<br>Università degli Studi di Bari<br>"Aldo Moro", Italy                                                                                            | Session #12: Explainable AI and<br>Recommender systems | TR26 |
| 15:00 –<br>16:10 | Prof Allegra De Filippo<br>Alma Mater Studiorum<br>Università di Bologna, Italy<br>with<br>Dr Giuseppe Spillo<br>Università degli Studi di Bari<br>"Aldo Moro", Italy | Session #13: Sustainable AI                            | TR26 |
| 16:10 –<br>16:15 | --                                                                                                                                                                    | Summer school closing                                  | TR26 |
| 16:15 –<br>16:30 | --                                                                                                                                                                    | Tea Break                                              |      |

\*Note: Some parts of the programme and some topics are currently being finalised with the speakers and will be updated online soon.
